

PRESS RELEASE

Title: Cavalry Solutions Introduces “Guided Professional Services”

Publication Date: 1 June 2009

Syracuse, NY. – Cavalry Solutions, Inc. is pleased to announce the availability of its newest service – the Cavalry GPS™. The Cavalry GPS™ (**G**uided **P**rofessional **S**ervices) is a totally unique offering to Cavalry Solutions customers. The Cavalry GPS™ seamlessly blends the independence provided by a professional services and consulting firm with the efficiencies realized by web-based software to create time and cost efficiencies in the delivery of compliance services.

The services offered through the Cavalry GPS™ platform mirror the modules found in the Cavalry Compass™. With nearly 60 modules currently offered, and more developed daily, the Cavalry GPS™ provides its users with an efficient means to assess, document, and mitigate enterprise risks. The Cavalry GPS™ delivery methodology is as follows:

- ★ **Remote Data Gathering** – Cavalry GPS™ clients will be given full access into the Cavalry Compass™ and will be asked to answer a brief questionnaire.
- ★ **Remote Information Review** – Cavalry Solutions professionals will access the responses contained within the Cavalry Compass™ to better understand the Cavalry GPS™ client’s organization.
- ★ **On-Site Verification** – Cavalry Solutions professionals will visit the Cavalry GPS™ client’s facilities to perform targeted interviews, observations, and where applicable, testing. Basing all on-site work on the information gathered with the Cavalry Compass™ will allow Cavalry Solutions’ professionals to complete their work expeditiously.
- ★ **Reporting** – Cavalry Solutions will prepare and deliver an independent report of organizational standing as well as granting the Cavalry GPS™ client access to their information within the Cavalry Compass™ for one year. Access to the Cavalry Compass™ will allow the Cavalry GPS™ client to keep their organizational information current to the organizational state (i.e. if the client mitigates an identified risk a minor adjustment within the Cavalry Compass™ will adjust organizational risk ratings).

To learn more about the Cavalry GPS™ offering, Cavalry Solutions itself, its suite of products, and how utilizing them can benefit your organization, please feel free to call (315) 422-7444 to schedule a free web-based demonstration.
