

CAVALRY SOLUTIONS™

PRESS RELEASE

Title: Cavalry Solutions Introduces the “Cavalry Professional Edge™”

Publication Date: 1 September 2009

Syracuse, NY. – Cavalry Solutions, Inc., a leading provider of automated enterprise risk management tools, is pleased to announce the availability of its latest offering: the Cavalry Professional Edge™ – a product designed to allow professional service and consulting firms to deliver uniform products to each of their clients while realizing internal efficiencies and cost savings.

The Cavalry Professional Edge™ is based on the framework of Cavalry Solutions’ flagship product: the Cavalry Compass™. The Cavalry Compass™ is a web-based tool which consists of a multitude of individual modules – each designed to accurately, concisely and completely guide users through a litany of regulations and industry best practices. The Cavalry Professional Edge™ leverages that content to provide professional services firms with:

- **A Competitive Edge** – Your professional services and consulting firm will be able to distinguish itself from the competition by *reducing* project costs, project completion time, and client-side disruptions while *increasing* the strength of your deliverable and the accuracy of your reporting.
- **A Driver of Customer Loyalty** – Above all else, using the Cavalry Professional Edge™ will strengthen the loyalty you have built with your customer base. Each engagement where the Cavalry Professional Edge™ is used will be accompanied by a free year’s subscription to the Cavalry Compass™ for the client. Over the course of that year the client will become accustomed to using the Cavalry Compass™ to document their organizational state. Keeping their organizational documented to its most current state will, in turn, facilitate future engagements your firm has with the client – increasing your firm’s profit margins without raising costs to the client.
- **A Customizable Solution** – Your firm can bring with it the clout and professionalism of the largest and most respected firms in the world. Cavalry Solutions can customize your Cavalry Compass™ application with your firm’s logos, colors and markings. Further, Cavalry Solutions can work with you to design your own modules.
- **A Project Oversight Tool** – The Cavalry Professional Edge™ will allow your “Project Managers” to oversee multiple project engagements remotely using a simple web interface.

To learn more about the Cavalry Professional Edge™ offering, Cavalry Solutions itself, its suite of products, and how utilizing them can benefit your organization, please feel free to call (315) 422-7444 to schedule a free web-based demonstration.
