

CAVALRY SOLUTIONS™

PRESS RELEASE

Title: Cavalry Solutions Releases Version 2.1 of the Cavalry Compass™

Publication Date: 1 February 2010

Syracuse, NY. – Cavalry Solutions has released version 2.1 of its flagship product, the Cavalry Compass™.

“The release of version 2.1 marks the most substantial evolution of the Cavalry Compass™ to-date.” says Robert Metz, Vice President of Product Development. Mr. Metz goes on to note *“This latest release incorporates a wide variety of enhancements. We have improved navigation throughout the Cavalry Compass™ - allowing for all users to establish questionnaires more easily than ever before. We have developed and included considerably more question-by-question guidance – making it easier for everyone providing answers to regulatory questions to best understand what is being asked prior to responding. In short, these improvements will continue to ensure that every users’ experience with the Cavalry Compass™ is as efficient and effective as possible.”*

The Cavalry Compass™ is a web-based risk assessment tool which consists of nearly 60 individual “Modules” – each designed to aid its users in the assessment of a regulatory mandate or industry best-practices theme. The individual Modules are arranged into three “Packages”. The Compliance Package assists its users in the assessment of the “Alphabet Soup” of regulation. The Internal Audit Package guides organizations through several themes including Branch Audits, Investments, and Personnel & Payroll reviews. The Information Security Package allows organizations to understand and begin the strengthening steps for securing their logical and physical space. Whether Cavalry Compass™ users need the entire tool, a specific Package, or an assortment of individual Modules, Cavalry Solutions can create a customized product to meet individual organizational needs.

Cavalry Solutions, Inc. is headquartered in Syracuse, New York and offers tools and services for Regulatory Compliance, Internal Audit, and Information Assurance for banks, credit unions and higher education organizations.
